2. Citations and explanations :

Reference is made to the following documents:

D1: KR 2003-62615 A

D2: KR 2001-61383 A

The present invention relates to an instant messenger service system having an IP(Internet protocol)-PBX(Private Branch Exchange) for providing an instant messenger function and Internet terminal for use therewith.

According to the claims 1-15, an instant messenger service system composes of an IP-PBX having an instant messenger server, an Internet terminal and LAN etc.

D1 relates to a private UMS(Unified Messaging System) using the extension numbers of a PBX is provided to offer UMS service to extension subscribers using the PBX.

D2 relates to an unified messaging method in a private network is provided to store an unified message as corresponding single mail box numbers endowed each user, and to receive the message by a single terminal.

In the view of the teachings of citations D1-D2 taken in combination, these citations disclose all of the features of the present invention claims 1-15. In fact, UMS server of D1/D2 is very similar with an instant messenger server. The present invention and D1-D2 taken in combination are very similar in view of providing a messenger service using an IP-PBX and a messenger server. Therefore, the claims 1-15 of the present invention do not involve an Inventive step in the sense of Article 33(3) PCT.

But, the claims 1-15 of the present invention seem to be novel(Article 33(2) PCT). The industrial applicability of the claims 1-15 is self-evident in the sense of Article 33(4) PCT.
